DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 19, 20, 24-36, and 37 are rejected under 35 U.S.C. 102(e) as being anticipated by Diachina, WO 96/41493. Referring to claims 19, 20, 24, 25, 27-30, 32-34, 36, and 37, Diachina discloses controlling digital control channels for broadcast SMS wherein SMS messages can be encrypted to support different classes of messaging service (access status). Based on appropriate fee payments, a subscriber would be able to decrypt SMS message of varying classes (preventing and allowing information access, first, second information access status). Upon payment the mobile stations of the subscribers would be provided with the encryption keys for the SMS messages via over the air methods or manual entry of smart cards (removable module) into the mobile stations (Page 40, lines 5-27).

Referring to claim 26, Diachina discloses that the SMS messages contain header information that discloses from which channel the mobile terminal can download the SMS message (Page 33).

Referring to claims 31 and 35, Diachina discloses that the channel can be GSM (Page 6, line 20).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Diachina, WO 96/41493, in view of Farrugia. Referring to claims 21-23, Diachina discloses controlling digital control channels for broadcast SMS wherein SMS messages can be encrypted to support different classes of messaging service (access status). Based on appropriate fee payments, a subscriber would be able to decrypt SMS message of varying classes (preventing and allowing information access, first, second information access status). Upon payment the mobile stations of the subscribers would be provided with the keys for the SMS messages via over the air methods or manual entry of smart cards (removable module) into the mobile stations (Page 40, lines 5-27). Diachina does not disclose storing the keys on the smart cards in an encrypted form. Farrugia discloses the use of smart card technology with cellular networks where the key used to decrypt encrypted cellular message are stored in an encrypted fashion on the smart card of the subscribers mobile terminal (Page 101). It would have been obvious to one of ordinary skill in

the art at the time the invention was made to encrypt the keys of Diachina on the smart cards in order to control access to the keys as taught in Farrugia (Page 102).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin E Lanier whose telephone number is 703-305-7684.

The examiner can normally be reached on M-Th0 7:30am-5:00pm, F 7:30am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron can be reached on (703)305-1830. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
